OPERATING INSTRUCTIONS:

Installing Batteries: Unscrew back cover of your spotlight to remove the battery shelf. The battery shelf has three (3) phillips screw heads on one end; be sure the screw heads are facing the back cover of the spotlight when inserting batteries as instructed below. Insert 3 x C batteries into battery shelf with a) two of the battery's positive ends facing the spotlight head (lens), and b) one battery positive end facing the back cover as shown in illustration at right. Align the 3 slots in the battery shelf with the 3 ridges inside the spotlight. Once battery shelf and batteries are in place, screw back cover on securely. Use alkaline batteries for maximum brightness and life.

Special Note: Use alkaline batteries for maximum brightness and life. Never mix old and new batteries. Never mix alkaline, standard (carbon-zinc), or rechargeable (nickel cadmium) batteries.

Push-button Switch: Simply push button switch to activate lighting modes: High, Low, SOS, and Off.

Bulb: LED (Light Emitting Diode) never needs replacing.

WARNING

To prevent damage to eyesight, never look into light when light is on. Never shine light into the face of someone else.

Convenient and adjustable pivoting leg allows handheld spotlight to be converted to a free-standing beam.
